PROFILE SUMMARY

Mechanical Engineering student with hands-on experience in CAD modelling, product design, fabrication, manufacturing, quality inspection, and shop-floor operations through internships, academic projects, and technical activities. Seeking an opportunity to develop practical industrial skills, apply engineering knowledge, and contribute effectively in a professional manufacturing environment.

TECHNICAL SKILLS

- **CAD & Design** — AutoCAD, SolidWorks, CATIA V5, Autodesk Fusion, Siemens NX
- **Manufacturing** — Manufacturing Processes, CNC Basics, Design for Manufacturing (DFM)
- **Mechanical** — Engineering Drawings, Dimensional Inspection, Quality Inspection
- **Practical Skills** — Fabrication, Compressor Assembly, Production Processes

EDUCATION

B.E. Mechanical Engineering — Kangeyam Institute of Technology, Kangeyam Pursuing
CGPA: 8.24 (up to 6th Semester)

Diploma in Mechanical Engineering — Arulmurugan Polytechnic College, Karur 2024
Percentage: 79%

SSLC — Kurinchi Matriculation School, Vellakovil (All Pass) 2021

PROJECTS

Fabrication and Mechanical Characterization of Hybrid Natural Fibre Composite Reinforced with Natural Fillers

- Worked on the fabrication of a hybrid natural fibre composite reinforced with natural fillers.
- Studied the mechanical characteristics of the fabricated composite material.
- Gained practical experience in material preparation, fabrication, and mechanical characterization.

MSME Design and Fabrication of Humanoid Robot

- Participated in the design and fabrication of a humanoid robot under an MSME project.
- Worked on mechanical design, fabrication, assembly, and component integration.
- Developed practical understanding of converting a design concept into a functional prototype.

Go-Kart Troubleshooting & Restoration

- Diagnosed and repaired a non-operational Go-Kart developed by senior students as part of a two-member team.
- Applied mechanical troubleshooting, assembly, and hands-on repair skills to restore the vehicle to working condition.
- Won 1st Prize in the college Science Exhibition.

INTERNSHIP & INDUSTRIAL TRAINING

Coral Engineering Works India Pvt. Ltd.

15 Days

Trained in coil manufacturing, quality inspection, and dimensional accuracy checks.

Gained exposure to compressor assembly, engineering drawings, and production processes.

INDUSTRIAL VISITS & TECHNICAL ACTIVITIES

- Mettur Thermal Power Plant: Observed large-scale industrial equipment, plant operations, and the industrial working environment.
- DMW CNC Solutions, Perundurai: Observed CNC machining and production workflows.
- Selected for the second round of the 24-hour ICT Academy Design Week Challenge, conducted in collaboration with Autodesk at Ramakrishna College of Engineering.
- Participated in CAD Modelling events at Kongu Engineering College and Hindusthan College of Engineering and Technology.
- Participated in CAD Modeling event at Kangeyam Institute of Technology
- Attended workshop on Robotic Welding at KPR Institute of Technology
- Attended seminar on Sensors and Artificial Intelligence for Human–Computer Interaction at Erode Sengunthar Engineering College
- Completed student upskilling training course in Computational Programming - 1D Analytical, FEM, AI conducted by Femsoft Technologies LLP & Metasage Alliance.

AREAS OF INTEREST

- Production Engineering
- Product Design & Development
- CAD Modelling
- Design for Manufacturing (DFM)
